

Build with brick
for generations
to come

Bricks for life.

Build with bricks manufactured in Tasmania

Not only are our bricks manufactured in Tasmania and good for the environment, building with Austral Bricks is a smart decision.

- **Clay Bricks are colourfast**

Unlike concrete bricks which can be coloured with an oxide, our clay bricks are made from natural materials, are colour fast and will never ever fade or lose their colour.

- **We offer a 100 Year Brick Guarantee**

Our clay bricks are guaranteed to last and won't rust, rot or fade. Our 100 Year guarantee is unmatched by any other building products supplier.

- **Bricks are stylish, creative and colourful**

Bricks add distinct style to any type of home. Their natural colours and textures enable you to create striking façade contrasts or more traditional neutral colour tones.

- **Bricks are low maintenance**

Unlike lightweight materials, bricks need very little maintenance, if any at all.

- **Bricks are an energy efficient MONEY SAVER**

The high thermal mass qualities of bricks means you will have less reliance on air conditioning and heating in your home, saving you money on energy bills.

- **Bricks are weatherproof**

- **Bricks are the smart choice**

Bricks last longer, are more durable, require less maintenance and are more energy efficient than lightweight materials – simple as that.

Build a home you can
live in happily ever
after in bricks
manufactured
in Tasmania.

Our commitment to Tasmania

Austral Bricks is excited to launch Australia's first ever certified carbon neutral brick. Proudly manufactured in Tasmania, Austral Bricks is the first brick manufacturer in Australia to have bricks certified by the Australian Government as Carbon Neutral. Using sustainable practices and protecting Tasmania's environment are major concerns for Austral Bricks, so we continue to improve our environmental impact and to support this great state. Austral Bricks commitment:

- Austral Bricks has been manufacturing bricks in Tasmania for 35 years and we have a long-term commitment to building Tasmania's economy, growing Tasmania's manufacturing capabilities and providing jobs for Tasmanians.
- We employ 25 employees and have invested over \$3,000,000 in the last 3 years.
- We invest heavily in improving energy efficiency and exploring alternative processes to reduce our operational impact on the environment.
- Using waste biomass to fire our kilns means that every year Austral Bricks has eliminated almost 8,000 tonnes of carbon dioxide emissions from the Tasmanian atmosphere (when compared to a traditional gas fired kiln).
- Brickworks purchases carbon credits that go towards Tasmanian projects such as native forest conservation, supporting the local forestry industry and protecting wildlife habitat.

Build a home you can live in happily ever after, with Austral Bricks®

From the minute you choose to build a brick home, your decision will start paying dividends – lower maintenance costs, lower energy charges, lower fire risk, reduced termite treatment and better environmental outcomes for the whole family.

A photograph of a man with short brown hair and a light beard, wearing a dark green cardigan over a white t-shirt. He is holding a sleeping baby with blonde hair in a plaid shirt. They are in front of a brick wall. The scene is brightly lit, suggesting sunlight. Two text boxes are overlaid on the left side of the image.

Save up to
25%
off your energy
bills with brick
every year^{1*}

Did you know
39%
of your energy
bills goes into
heating and
cooling your home²

All of this and the guarantee that your investment will continue to save money and appreciate in value for the generations to come; your children's children will reap the benefits of building with clay brick.

It's a choice that will last several lifetimes and beyond. Look around the world's oldest cities; brick buildings have withstood the ravages of the ages. Look around today's newest suburbs and you'll find the most modern, stylish and practical homes are built of clay brick.

Building your home with clay brick ensures it remains weatherproof, durable and attractive for years to come. It's cost-effective because brickwork doesn't need painting, rendering or any other coating to preserve its good looks and durability. Unlike other materials, bricks keep your home stylish without all the hard work. Better still the natural texture of clay brick actually hides dirt, unlike paint finishes which highlight grime.

bricks for living™

35 years

Australia's First certified Carbon Neutral Bricks.

Using sustainable practices and protecting our environment are major concerns for Daniel Robertson so we became the first brick manufacturer in Australia to produce certified carbon neutral bricks. That means we have significantly reduced our carbon footprint and offset the remaining emissions.

Zero Net Emissions.

The entire range of Daniel Robertson bricks are carbon neutral.

Reducing Daniel Robertson's carbon footprint.

Daniel Robertson achieved carbon neutral bricks by reducing emissions through efficiency improvements and by offsetting the remaining emissions. This breakthrough has been assessed and certified against the Australian Government's National Carbon Offset Standard.
